

## Seed Savers Reference Table

Common Name	Latin Name	Pollination	Life Cycle	*Inbreeder/ Outbreeder	Minimum isolation distance for home use	Minimum isolation distance for commercial production	Minimum population size for genetic stability	Seed Viability in good storage (years)	Comments
Arugula or Rocket	<i>Eruca sativa</i>	insects	A	VO	500 m	1.5 km	80	2	No named cultivars so crossing not a problem
Basil	<i>Ocimum basilicum</i>	insects	A	VO	500 m	1.5 km	80	5	
Bean, Common	<i>Phaseolus vulgaris</i>	self	A	PI	3 m	6 m	10 – 20	3	
Bean, Fava or Broadbean	<i>Vicia faba</i>	self, insects	A	BIO	250 m	0.5 - 1 km	40	4	Includes bell beans
Bean, Lima	<i>Phaseolus lunatus</i>	self, insects	A	PI	100 - 200 m	50 - 100 m	40	3	
Bean, Runner	<i>Phaseolus coccineus</i>	self, insects	A	BIO	250 m	0.5 - 1 km	40	3	
Bean, Cowpea	<i>Vigna unguiculata</i>	self, insects	A	BIO	50 m	100 - 200 m	40	5	Crosses w/ asparagus bean
Beetroot	<i>Beta vulgaris</i>	wind	B	VO	1 km	2 - 5 km	80	5	Crosses w/ chard, mangels & sugarbeets
Broccoli	<i>Brassica oleracea</i>	insects	A or B	VO	500 m	1.5 - 3 km	80	5	Crosses w/ all <i>B.oleracea</i> crops
Brussels Sprouts	<i>Brassica oleracea</i>	insects	B	VO	500 m	1.5 - 3 km	80	4	Crosses w/ all <i>B.oleracea</i> crops
Cabbage	<i>Brassica oleracea</i>	insects	B	VO	500 m	1.5 - 3 km	80	4	Crosses w/ all <i>B.oleracea</i> crops
Capsicum	<i>Capsicum annum</i>	self, insects	A	PI	50 m	100 - 200 m	10 – 20	5	Must isolate from chillies using chilli's isolation distances
Carrot	<i>Daucus carota</i>	insects	B	PO	500 m	1.5 - 3 km	200	3	Crosses w/ Queen Anne's Lace
Cauliflower	<i>Brassica oleracea</i>	insects	B	VO	500 m	1.5 - 3 km	80	4	Crosses w/ all

Common Name	Latin Name	Pollination	Life Cycle	*Inbreeder/ Outbreeder	Minimum isolation distance for home use	Minimum isolation distance for commercial production	Minimum population size for genetic stability	Seed Viability in good storage (years)	Comments
									B.oleracea crops
Celery	Apium graveolens	insects	B	VO	500 m	1.5 - 3 km	80	5	Crosses w/ celeriac
Celeriac	Apium graveolens	insects	B	VO	500 m	1.5 - 3 km	80	5	Crosses w/ celery
Chicory, Witloof	Cichorium intybus	insects	B	VO	500 m	1.5 - 3 km	80	8	Crosses w/ wild chicory & radicchio
Chilli	Capsicum spp.	self, insects	A	BIO	250 m	0.5 - 1 km	40	5	Must isolate equally from other chillies and sweet capsicum
Collards	Brassica oleracea	insects	B	VO	500 m	1.5 - 3 km	80	4	Crosses w/ all B.oleracea crops
Coriander or Cilantro	Coriandrum sativum	insects	A	PO	500 m	1.5 - 3 km	80	3	
Corn	Zea mays	wind	A	PO	500 m	1.5 - 3 km	200	2 – 10	
Cucumber	Cucumis sativus	insects	A	PO	500 m	1.5 - 3 km	10 – 20	4 – 10	Armenian cucumber is C. melo
Dill	Anethum graveolens	insects	A	PO	500 m	1.5 - 3 km	80	3	
Eggplant	Solanum melongena	insects	A	PO	500 m	1.5 - 3 km	80	5	
Endive	Cichorium endivia	self	B	VI	3 m	6 m	10 – 20	5	
Kale, European	Brassica oleracea	insects	B	VO	500 m	1.5 - 3 km	80	4	Crosses w/all B.oleracea crops
Kale, Siberian	Brassica napus	insects	B	VO	500 m	1.5 - 3 km	80	4	Crosses w/ rutabaga and canola
Leek	Allium ampeloprasum	insects	B	PO	500 m	1.5 - 3 km	80	3	

## Seed Savers Reference Table

Common Name	Latin Name	Pollination	Life Cycle	*Inbreeder/ Outbreeder	Minimum isolation distance for home use	Minimum isolation distance for commercial production	Minimum population size for genetic stability	Seed Viability in good storage (years)	Comments
Lettuce	Lactuca sativa	self	A	VI	3 m	6 m	10 – 20	5	
Melon	Cucumis melo	insects	A	PO	500 m	1.5 - 3 km	10 – 20	5	Crosses w/ Armenian cucumber
Mustard greens	Brassica juncea	insects	A or B	VO	500 m	1.5 - 3 km	80	3 – 7	
Okra	Abelmoschus esculentum	self, insects	A	BIO	250 m	0.5 - 1 km	40	5	
Onion	Allium cepa	insects	B	PO	500 m	1.5 - 3 km	200	2	
Parsley	Petroselinium crispum	insects	B	PO	500 m	1.5 - 3 km	80	3	
Parsnip	Pastinaca sativa	insects	B	PO	500 m	1.5 - 3 km	80	1	
Pea	Pisum sativum	self	A	VI	3 m	6 m	10 – 20	3	
Pumpkin	Cucurbita pepo	insects	A	PO	500 m	1.5 - 3 km	10 – 20	3 – 10	eg. Table Queen
Pumpkin	Cucurbita maxima	insects	A	PO	500 m	1.5 - 3 km	10 – 20	3 – 10	eg. QLD Blue
Pumpkin	Cucurbita moschata	insects	A	PO	500 m	1.5 - 3 km	10 – 20	3 – 10	eg. Butternut
Pumpkin	Cucurbita argyrosperma	insects	A	PO	500 m	1.5 - 3 km	10 – 20	3 – 10	Formerly Cucurbita mixta
Radicchio	Cichorium intybus	insects	B	VO	500 m	1.5 - 3 km	80	8	Crosses w/ chicory
Radish	Raphanus sativus	insects	A	VO	500 m	1.5 - 3 km	80	4	May cross w/ wild radish
Rutabaga	Brassica napus	insects	B	VO	500 m	1.5 - 3 km	80	4	Crosses w/ Siberian kale and canola
Silverbeet	Beta vulgaris	wind	B	VO	500 m	2 - 5 km	80	5	Crosses w/ beets, mangels & sugarbeets

Common Name	Latin Name	Pollination	Life Cycle	*Inbreeder/ Outbreeder	Minimum isolation distance for home use	Minimum isolation distance for commercial production	Minimum population size for genetic stability	Seed Viability in good storage (years)	Comments
Spinach, English	Spinacea oleracea	wind	A	VO	1 km	2 - 5 km	80	5	
Squash, Summer	Cucurbita pepo	insects	A	PO	500 m	1.5 - 3 km	10 – 20	3 – 10	Check species. A few are C. moschata.
Squash, Winter	Cucurbita spp.	insects	A	PO	500 m	1.5 - 3 km	10 – 20	3 – 10	Learn the species of each variety
Tomato, modern	Solanum lycopersicum	self	A	VI	3 m	6 m	10 – 20	4	If multiple tomato types are present use the greatest isolation distance
Tomato, some Heirlooms	Solanum lycopersicum	self, insects	A	PI	12 m	50 - 100 m	10 – 20	4	If multiple tomato types are present use the greatest isolation distance
Tomato, Currant	Solanum pimpinelifolium	self, insects	A	BIO	50 m	100 - 200 m	40	4	If multiple tomato types are present use the greatest isolation distance
Turnip	Brassica rapa	insects	B	VO	500 m	1.5 - 3 km	80	5	Crosses w/ many Asian greens
Watermelon	Citrullus lanatus	insects	A	PO	500 m	1.5 - 3 km	10 – 20	5	
Zucchini	Cucurbita pepo	insects	A	PO	500 m	1.5 - 3 km	10 – 20	3 – 10	Check species. A few are C. moschata.

\* very inbreeding (VI), primarily inbreeding (PI), very outbreeding (VO)  
both inbreeding and outbreeding (BIO), primarily outbreeding (PO)
